ABOUT ME

Motivated Computer Science Engineering student with strong analytical skills and a growing passion for software development, data handling, and UI design. Skilled in Python, SQL, UI fundamentals, and problem-solving. Eager to apply technical knowledge to real-world projects, collaborate in team environments, and continuously expand professional skills.

EDUCATION

Alva's Institute of Engineering and Technology, Mijar
Bachelor of Computer Science and Engineering – CGPA: 6.89

2024 – 2025
Mangalore, Karnataka

Govt. Polytechnic Vidyanagar, Hubli
Diploma in Computer Science – Percentage: 60%

2021 – 2024
Hubli, Karnataka

Rotary School Deshpande Nagar, Hubli
Secondary Schooling – Percentage: 89%

2010 – 2021
Hubli, Karnataka

PROJECTS

IoT-Based Elderly Health Monitoring System

- Developed a smart health monitoring system for elderly people using IoT-based wearable sensors.
- Monitored vital parameters such as heart rate, body temperature, and movement activity.
- Implemented real-time alert notifications for emergency situations to improve patient safety.
- Designed a simple dashboard interface to display health data and status updates clearly.

Home Service Management System

- Built a simple service-management platform connecting users with local technicians.
- Designed user-friendly UI with HTML, CSS, and JavaScript.
- Implemented structured workflows and role-based user navigation.
- Applied user research, wireframing, and interaction design concepts.

Student Performance Analytics Dashboard

- Developed a dashboard to analyze performance, attendance, and subject trends.
- Used Python and SQL for backend data processing and Excel for visualization.
- Created clear UI and layout based on UX principles and data clarity.
- Integrated chart-based insights using JavaScript visualization libraries.

College Event Management Portal

- Designed a prototype web portal for event registration, coordination, and updates.
- Developed responsive pages using HTML, CSS, and JavaScript.
- Created structured information architecture, navigation flow, and UI components.
- Used Python scripts and SQL tables for basic event data handling.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, SQL, Java

Web Technologies: HTML, CSS, JavaScript

Data Visualization: Excel, Tableau

Other Skills: UI/UX Fundamentals, Wireframing, User Research, Prototyping, Interaction Design

CERTIFICATIONS

- Coursera – Software and Project Management
- Infosys Springboard – C, Java
